

III  IYNT 2015

**Review for the
Problem № 6**

Team «MG 12»

The reporter's work

Positive sides

- The experiments were very illustrative
- The mechanism of work of the inks was explained
- There were introduced a few ways of solving a problem
- The conclusion was relevant to the problem
- The problem was solved

Negative sides

- The work didn't contain a plan. There was no hypothesis.
- The experiment with milk seems to be irrelevant to the problem as milk is invisible on the paper.
- There was no bibliography

The opponent's work

- The ways of improving were suggested
- There was made a comprehensive analysis

Summary of the discussion

- The reporter gave too short answers. For example, the mechanism of ethanol working was not explained completely
- Although, the main processes were explained/
