

# // 15. FLY

---

Opposition – Matija Martinčić

Team Croatia

# The problem

- A fly can easily walk on a ceiling. How is this possible?  
Can one find such a ceiling that the fly would be unable to walk on?

# Clarifying questions

- Can you describe fly's legs?
- How does attaching to surface work?
- On what is fly's glue based?
- Can it be removed from fly's legs?

# The solution

- Problem is not solved, it is only poorly described fly's legs but there is no solution for ceiling on which fly can't walk

# Points for discussion

- Different surfaces
- Removing glue from flys legs
